Disposable Sensors from NUOVA

Disposable Sensors

Features: white hypoallergenic smooth tape, ideal for neonates and sensitive skin available for most common oximeters. 24 pc per box, hygienically packed.

Reusable Sensors from NUOVA

Silc-touch sensor line (S-SX-, S-SM-, S-SP-types) are reusable silicon rubber boot sensors, all made from biocompatible materials. Three options are available: large adult (S-SX) features a tighter grip around the finger in order to minimize artefacts and at the same time can be used on smaller fingers likewise. The medium size version of the (S-SM) for juveniles and small adult fingers and finally the pediatric style (S-SP) completes the range.

Clip-touch (S-F type) is a clip type sensor of unmatched performance. Robust and basically unbreakable Polyamid shells along with openly suspended silicon finger pads make this sensor very comfortable even when applied for longer times on the patient finger. To avoid popping out of the spring and losing spring tension over the life-time of the sensor it has been designed with a stainless steel axle fixing upper and lower clip shells. A most economic finger clip (S-O type) is available from Nuova now. Designed as the „classic“ finger clip it is the right choice where price and quality matters likewise.

silc touch
pediatric sensor

Designed for optimal comfort and accuracy

For use with children or small adults
